YOU HAVE BEEN REFERRED TO AN ENDODONTIST

Although many general dentists perform root canal procedures, your dentist feels your case requires the attention of a specialist. Endodontists are dentists who have additional training after dental school in root canal procedures. They are experienced in treating complicated root canal cases, diagnosing and relieving oral pain, and treating traumatic injuries. By referring you to a specialist, your dentist is demonstrating a personal concern for the quality of your dental care. After your endodontic therapy is completed, you will return to your dentist for a final restoration (cap, crown, filling, etc.) of the tooth. Your dentist will continue to oversee your dental care.

Our goal is to provide a comfortable treatment experience and achieve a predictable result. For answers to any questions pertaining to your upcoming appointment at Whatley Endodontics please visit our website at www.whatleyendo.com or call (256) 724-3120. We look forward to meeting and serving you.

Directions:

We are located just off of Highway 72.

- Driving East on Highway 72, just past Progress Bank, take a right onto Brookridge Drive. We are the 3rd building on the right in the curve.
- Driving West on Highway 72, take a left onto Brookridge Drive, the first marked street past the Target Shopping Center. We are the 3rd building on the right in the curve.
